

Raspberry (summer-fruiting) — Quick Guide

Best Method

- Suckers / hardwood cuttings

Root Time

- 6-10 weeks

Potting-On

- Pot in late winter to early spring.

Propagation Tips

- Lift young suckers with root and pot up.
- Alternatively, take 20 cm hardwood pieces and insert into gritty mix.
- Good for sheltered balcony fruiting.

Label Format

- Example: "Raspberry (summer-fruiting) — Suckers / hardwood cuttings — 12-Oct"
